

Since the dawn of Satellite radio, it has given a choice to the traditional radios stations. The quality of the sound makes it so easy to enjoy everyday music, news channels, weather and traffic reports. I find it very beneficial to have access to the traffic and weather forecasts for the city i live in as well as other cities around the country. I dont want to change my satellite channel just to listen to the traffic and weather reports. It will be very inconvenient to remove this service.
